FINANCIAL & DATA ANALYST

Certified Microsoft Power BI Data Analyst Associate

Certified in Financial Modeling on Excel

EXPERIENCE PROFESSIONNELLE

Financial & Data Analyst at CINETPAY | Since OCT. 2020

- I have set up a system for collecting and centralizing data from various sources provided by the Finance Department.

- I set up a budget monitoring dashboard (on Excel) to detect discrepancies and guide decision-making.

- I developed and deployed several dashboards tracking the CFO's KPIs with Power BI.

- I took part in drawing up the company's budget for previous years and prepared periodic analyses of financial data.

I've worked on financial models linking the income statement, balance sheet and cash flow statement, and I've carried out several scenario analyses on financial data to guide and facilitate decision-making.

- Using Power BI, I developed and deployed a dashboard to monitor working capital requirements (WCR) for top management and investors.

- I worked on a Machine Learning project for the Treasury department to prevent cash shortages.

- I've designed and deployed more than 10 Power BI dashboards covering several areas such as finance, sales, marketing, merchant management, information systems etc.

(2) PROJECT SUPERVISOR at PROJET DCDJ/MCC/PEPFAR

OCT. 2019 – OCT. 2020

Supervision and support for a number of innovative healthcare projects as part of the DCDJ project

- Design and development of innovative technological solutions to meet the needs of NGOs working with PEPFAR.
- Management of a major project involving the production of a dashboard to visualize data from the SIGDEP2 software.
- Piloting a capacity-building project on the national SIGDEP 2 software at 23 PEPFAR priority sites.

- Training of NGO staff in the use of Excel

What I've achieved/ What I've acquired

- I learned how to manage projects using the AGILE methodology (even when teleworking).

- I developed an index testing reporting application designed with VBA & Excel and Python for the CSU COM Pangolin Koumassi site.

- I developed a Lost to Sight (LTS) follow-up and follow-up application in VBA & Excel for the Bingerville General Hospital.

(3) Monitoring and Evaluation Officer at HEARTLAND ALLIANCE CI
MAR. 2019 – OCT. 2019

- Gathering, consolidating and processing data from a variety of sources to extract information useful for decision-making.

- Preparation of periodic reports (daily, weekly and monthly)

- Processing requests for information from other departments within the organization

What I've achieved/ What I've acquired

- I set up a file template to automate the reporting of HIV data from the PROTECT and NFM2 programs using VBA & Excel.

- In collaboration with SEJEN CI, I helped set up an SQL database to monitor PROTECT program indicators.

OTHERS SKILLS

- I'm solution-oriented

- I am organized, dynamic and rigorous

- I can work alone or in a team

- I'm a great problem solver

- I am able to work under pressure

- I am a good communicator and I know how to present my results.

Dear Madam/Sir,

You're looking for an FP&A Analyst who can collaborate at all levels of the organization by developing an understanding of Wave's business model, who will perform quantitative analysis of financial data, build databases from multiple data sources, prepare financial information and who will be able to deliver results.

My career path has enabled me to deal with every aspect of your needs, and I have the know-how and interpersonal skills you're looking for. I'm passionate about processing and analyzing financial data, and I know how to do financial modeling. I have a very good command of the usual office software such as Excel, and I know how to present the results of my analyses using visualization software such as Power BI or PowerPoint.

I would like to talk to you so that you can get to know me better. I remain available for any further information.

Nathan OKOU.
